General Information

Description

Excelerate SPANISH is a dynamic, multi-sensory approach designed to replicate the process by which all people learn their first language. Lessons mimic real-life situations and provide meaningful contexts and a low-stress environment, all while enabling students to respond to and retain the new vocabulary and structures.

Expectations and Goals

It is **required** that all students review the appropriate lessons in their lesson books each week and do as many of the workbook activities as they can do, happily, and with confidence. It is also **required** that all high school students (and/or middle school students seeking class credit) complete the assignments, as outlined in this syllabus. The smaller the class size, the more often students will be called upon. Please do your best to build UP the morale of the class: smile, encourage others, and have fun!
